

Sample Tobacco Treatment Note Template Prompts

Text indicates dropdown menu options

Tobacco History (populated automatically in note template from social history)

Smoking status	Current daily smoker
Smokeless tobacco	Never
Vaping	Never

I provided tobacco cessation counseling during our **video/clinic** visit. We discussed the benefits of quitting tobacco on cancer care. We discussed treatment options and I recommended use of both counseling and medication to reduce or quit using tobacco.

We discussed medication options including **nicotine patches, gum, lozenges, nasal spray, inhalers, varenicline, bupropion**. The patient chose **nicotine patches, gum, lozenges, nasal spray, inhalers, varenicline, bupropion, no medication**.

We discussed counseling resources including referral to **tobacco treatment specialist, behavioral health, quitline, Smokefree.gov**. The patient chose **tobacco treatment specialist, behavioral health, quitline, Smokefree.gov, no referrals**.

I spent minutes discussing tobacco treatment and counseling with the patient during this encounter.
